Nicola Tesla.

For some reason his name is not widely known though he could join the company of the most famous scholars like Edison and Newton. He achieved remarkable results in mechanics, engineering, electricity, magnetism, and energy transmitting. His researches and his astonishing discoveries could have accelerated the science and technological progress tremendously, but they didn't.

The bulk of his theories and drafts were never implemented. Lots of his theoretical and engineering works were either never published, or lost, or just vanished and even the family weren't able to trace the track of the papers.

The oblivion and rare references in scientific and popular science journals could have been caused by different reasons, his complicated and controversial personality included, but anyone who is keen on physics is very well familiar with his name - Tesla is the unit to measure magnetic induction or magnetic flux, and is used to define the intensity of magnetic fields.

Nicola Tesla was born in 1856 and died in 1943. Serbian by origin, he spent most of his life in the United States and his life there was very diverse. He did unskilled jobs to feed himself and to generate money for research. He was vice president of the American Institute of Electrical Engineers. He cherished his friendship with Mark Twain and argued severely with Edison.

He had a photographic memory, was fluent in about eight languages and was claimed to suffer from mental disorder at the end of his life. Data about him is rather controversial. According to some documents, it was he who invented the radio and designed radio controlled devices. There is evidence that at the very end of the nineteenth century Tesla demonstrated a radio-controlled boat at the electrical exhibition in the United States, though radio-controlled devices were not used till the middle of the twentieth century. Even more stunning and unbelievable were Tesla's experiments with electricity.

Tesla supposed that it was possible to generate electricity from atmosphere and to transmit it wirelessly over huge distances. He had a specially equipped laboratory in Colorado Springs, State Colorado, the USA, where he experimented with electricity. According to his biographers the results were astonishing.

Tesla was able to create artificial lightning, much more powerful than the natural thing, and made it move in a certain direction, to a precisely calculated destination. If that had been true, it would make the most powerful and disastrous weapon mankind has ever known. There is a hypothesis, by the way, that the Tungus meteorite or Tunguska event, which happened in remote Siberia forests in 1908, was not a natural space body which exploded near the surface of the earth, but it was the effect of Tesla testing his directed energy weapon.

1. The author believes that the scientist
 - a) was as talented as his contemporary Newton.
 - b) his discoveries have accelerated the science and technological progress.
 - c) was known to the public.
 - d) was Edison's and Newton's friend.
2. His theoretical and engineering works were never implemented because
 - a) they were not important for science.
 - b) they were either lost, or vanished, or never published.
 - c) he works in a very narrow scientific field.
 - d) his family wanted to get much money for his papers.
3. According to the author, Nicola Tesla
 - a) cherished his friendship with Edison and argued severely with Mark Twain.
 - b) was the president of the American Institute of Electrical Engineers.
 - c) was born in eighteen century and died in nineteen century.
 - d) at the end of his life was claimed to suffer from mental disorder.
4. The author says that
 - a) Tesla supposed that it was possible to transmit it wirelessly over huge distances.
 - b) Tesla supposed that it was impossible to generate electricity from atmosphere.
 - c) in his laboratory in the USA he experimented with the universal Law of gravitation.
 - d) Tesla developed the idea of evolution of all living things from simpler creatures.
5. The author
 - a) is sure that Tesla succeeded in creating artificial lightning.
 - b) doubts that Tesla succeeded in creating artificial lightning.
 - c) is absolutely sure that it's impossible to create artificial lightning.

d) believes they Tungus meteorite was actually Tesla's artificial lightning.

Чтение

Задание №1.

Установите соответствие между заголовками **A-F** и текстами **1-5**. Занесите свои ответы в таблицу. Используйте каждую букву только один раз. В задании **один заголовок лишний**.

A. Disappeared people B. Depending on the weather C. Organizing people in case of emergency D. A dangerous street accident E. Protection from flood F. Emergency exits are to be done.

1. It took many hours for workers to shut the water off when a large water pipe broke. Water gushed out of it. The streets flooded. The water pipe that broke was underground. The pressure from the water coming out of the pipe broke the street. The street fell into a huge hole. This break caused a lot of damage. One woman`s car flooded. It had four inches of water in it. There was a lot of work to be done.

2. Firefighters hope to have control of a big fire by Friday. It has already burnt a lot of land. Firefighters worked all night, their hard work saved a lot of land. Now firefighters are worried. The wind is starting to blow. They think that the winds could fan the flames again. When wind fans a flame, it helps the fire grow. This would be very bad. The firefighters are hoping that the winds do not get any stronger.

3. There was a fire that burnt a house down. The local police are trying to find out how it started. There was a man and three children who are missing. No one knows what happened to them. The mother of the missing children could not find them. She did not know if they were in the home before it burnt. She has not seen the father of her children since the fire. The police are not sure how the fire started. There is nothing that shows that fire was started on purpose but the police want to make sure.

4. In spring, heavy rains and melting snow add a lot of water to the lake behind Folsom Dam. People believe too much water could breach the dam. Then the dam might break and flood the towns below the lake. A flood would be very dangerous for the people who live near the dam. They need to find a solution and a way to keep the nearby towns safe. Senator Deborah Ortiz has an idea that might help. She wants to ask the State of California for funds to make the Folsom Dam seven feet taller.

5. Mr. Baldwin believes the way California handles disasters is a good one. People need to know when there is an emergency. They need to be warned. People can be given warnings over the radio. They are also warned over the television. Mr. Baldwin also says that more work needs to be done in an emergency. One thing he is worried about is how to evacuate people from towns. People need to know where to go if they have to leave their homes.

Задание №2 Вставьте необходимое выражение (1-7)

Mobile phones

On New Year`s Day, 1985, Michael Harrison phoned his father, Sir Ernest, to wish him a happy new year. Sir Ernest was chairman of Racal Electronics, the owner of Vodafone, **A**_____. At the time , mobile phones weighed almost a kilogram, cost several thousand pounds and provided only 20 minutes talktime. The networks themselves were small; Vodafone had just a dozen masts covering London. Nobody had any idea of the huge potential of wireless communication and the dramatic impact **B**_____. Hardly anyone believed there would come a day when , mobile phones were so popular **C**_____. But in 1999 one , mobile phones was sold in the UK every four seconds, and by 2004 there were more , mobile phones in the UK than people. The boom was a result of increased competition which pushed

prices lower and created innovations in the way that mobiles were sold. When the government introduced more competition, companies started cutting prices to attract more customers. Cellnet, for example, changed its prices, **D**_____. It also introduced local call tariffs. The way that handsets themselves were marketed was also changing and it was Finland's Nokia who made **E**_____. The mobile phone industry has spent the later part of the past decade reducing its monthly charge **F**_____, which has culminated in the fight between the iPhone and a succession of touch screen rivals.

1. trying to persuade people to do more with their phones than just call and text
2. that there would be more phones in the UK than there are people
3. and relying instead on actual call charges
4. that mobile phones would have over the next quarter century
5. the leap from phones as technology to phones as fashion items
6. and his son was making the first-ever mobile phone call in the UK
7. the move to digital technology, connecting machines to wireless networks

2. Части текста перепутаны. Поставьте их в правильном порядке

A) He often told his friends that he could tell anyone's character exactly by his handwriting. So one lady friend decided to give it a test.

B) The lady was surprised. She smiled and explained that this was Balzac's own exercise book which he used when he was a little boy.

C) She brought him a young boy's exercise book. She said she wanted to know what Balzac thought of the boy's character.

D) Balzac, the famous French writer, was a man of great talent. He was very proud of his ability to tell a person's character by his or her handwriting.

E) He decided to tell the truth. The boy's exercise book showed that it was written by a bad, lazy fellow with no respect to other people.

She told him that the boy wasn't her son and asked him to tell her the truth. Balzac studied the boy's handwriting very carefully.
